

Jerusalem TDE Workshop

November 02-05, 2015

General

The past few years have witnessed a surge of new observations of tidal disruption events and an ensuing flurry of theoretical activity. With the first sample of optical TDEs in hand, more and more events are being identified and followed by various transient surveys. This new data has sparked renewed theoretical interest, yielding novel interpretations and intriguing predictions. At this exciting time in the field, it is important to get together and discuss these new advances.

Jerusalem TDE Workshop, on November 2-5, 2015 will take place at the Israel Institute for Advanced Studies, at The Hebrew University of Jerusalem, Israel. The meeting will be in the format of a workshop to encourage interaction and collaboration. To allow for productive discussion, we are limiting participation to a small group of researchers actively engaged in TDE studies.

TDE School will take place on November 1, 2015.

Transportation from Ben-Gurion Airport to Jerusalem

You will be arriving at Ben-Gurion Airport, which is located about 15 minutes from Tel Aviv and 40 minutes from Jerusalem. Private taxis to Jerusalem can be found as you exit the arrivals terminal, and cost about \$70 (roughly NIS 262 – the exchange being: NIS 3.8 for \$1).

You could also take the 'Nesher' Taxi, a shared door-to-door shuttle, for the set price of 64 Shekels (about \$18). It operates 24 hours a day and can be easily found to your right as you exit the arrivals terminal. Either way, please ask the driver to drop you off at your designated hotel.

It is advisable that you carry a copy of the workshop invitation letter with you.

Computer Connections and Working Space

Please bring your laptop with you, if you wish to use a computer during the conference for your personal needs. There is free access to wireless Internet (WiFi) at the Givat Ram campus. Participants who have laptop computers with wireless capabilities, can gain basic Internet access: The network name is (SSID) "HUJI-guest"

Weather

Jerusalem is about 800 meters (2640 feet) above sea level; at geographic latitude 31 47' N and longitude 35 13' E.
